Evaluation Scale

For each criterion, please use the following ratings:

Fail (F) Low Pass (C) Pass (B) High Pass (A)

Rating

Comments

1. Was the problem clearly defined? Was the need for the project justified

2. Were the goals and objectives clear? Do they adequately address the need?

3. Was the project plan acceptable, was execution of the plan well managed?

4. In response to challenges and barriers, were problem-solving skills demonstrated?

5. Were results from analytical work, data from testing, or profiles from computer modeling provided and well-described?

6. If applicable, was the economic analysis adequate? Were the business and competitive aspects of the project covered?

7. Based on deliverables and pre-determined “measures of success” and anticipated results, was the project a success?

8. Quality of the oral presentation.

Overall evaluation of the student’s work on this project

How did this work compare with your expectations for a project at the Masters Degree level?

Would you hire this person? Yes, No; Briefly explain
